Subject: Comments on Microsoft Judgement

Sirs:

The proposed judgement on the Microsoft antitrust case is inadequate to address existing and future problems. I have continually been forced to change my way of doing business as a result of Microsoft's practices. Word processor software, version control software, and many other software forms; the vendors have either been forced out of business, purchased and disbanded, unable to compete with Microsoft products due to inavailability of information of 'secret' Window's interfaces.

A much more strict and comprehensive set of damages is needed.

Dr. John O. Ballenthin
